Lawrence's Goldfinch

A male Lawrence's goldfinch was seen at our feeder on Saturday May 3rd at noon. I was in a mixed flock of American and Lesser goldfinches with a few pine siskins and house finches. We observed it for less than 15 minutes.

We live at 532 Jeffrey Drive Ashland Oregon 97520. Our house overlooks Emigrant Lake, is mixed oak woodland, near the house and feeder we have a large variety of vegetation much of it designed to attract birds. We have 10 acres most of it Oak woodland. We mow about half of it once a year.
